## DETAILED ACTION

Applicant has filed an RCE on 6 February 2006, which included an IDS. After careful consideration and a newly run prior art search the application still is seen as being novel as described below.

### Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: No prior art uncovered anticipates or renders obvious applicant(s) claimed said isolated converter transformer and a capacitance of the primary side resonant capacitor; primary side partial voltage resonant circuit partial voltage resonant operation during switching devices forming said switching period turned off, said primary side partial voltage resonant circuit being formed by capacitor connected switching devices forming 'inductance component capacitance of partial resonant least the the leakage said isolated parallel with said switching primary winding converter transformer; and performing synchronous rectifier circuit providing secondary side direct-current output voltage as voltage across secondary side smoothing capacitor by performing rectifying operation on an alternating voltage induced secondary winding said isolated converter transformer and charging said secondary side smoothing capacitor with rectified current; wherein said synchronous rectifier circuit includes: first field-effect transistor inserted between one said secondary winding and negative electrode terminal of said secondary side smoothing capacitor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of
